

aquamix

AQUAMIX is a blended non-ionic and degradable wetting agent especially formulated for use in peat and bark based growing substrates.

When treated with AQUAMIX, dry soil less mixes take water rapidly and more uniformly, so there is less run-off. Excess water cannot cling to treated mixes. Water use can be reduced significantly.

DIRECTIONS FOR USE

For greater detail ask distributor for additional documentation.

Preparing media : for 1 cu.yd of media, incorporate 2 1/2 to 5 fl.oz of AQUAMIX in 1/2 to 2 1/2 gal water to get uniform distribution.

Note : for seedlings media, use no more than 2 1/2 fl.oz per cu.yd.

Media in use without a wetting agent : drench with AQUAMIX at 3/4 tsp/gal.

Note : for seedling and open flowers, use only 1/4 tsp/gal.

CAUTION KEEP OUT OF REACH OF CHILDREN.

Harmful if swallowed, irritating to eyes and skin. Avoid breathing vapor or mist. Do not apply this product in a manner as to directly or through drift, expose workers or other persons.

Applicators and other handlers of the product must wear goggles or facial shield, chemical resistant gloves such as nitrile or neoprene rubber, coveralls or long pants, long sleeved shirt, shoes and socks.

First aid

In the event of eye contact, rinse immediately the eyes eyelids open with plenty of water for 15 minutes and seek medical attention. For skin contact, remove contaminated clothing and flush with water and seek medical attention if irritation persists.

If inhaled, move person to fresh air, give artificial respiration if necessary and get medical attention.

If swallowed, if conscious, drink large amounts of water and induce vomiting. Get immediate medical attention.
